

The Goal of the **Hooked for Life** model is to recruit, capture, develop and retain players for life whilst maximizing their potential. The model is player centred with a view to providing a pathway in which a fun and enjoyable game is delivered through quality coaching. The model is developed around phases with age only as a guide. A player's phase will be determined by their physical maturity, the level at which they play and when they enter the sport. Although the diagram is linear in its presentation it is recognized that many areas overlap across phases. This overview has been developed to provide an easy to understand pathway for player development and to demonstrate what the player, coaching and game should look like at each phase for all to see and understand. The model takes a bottom up approach. Starting at Phase 1, if we get every subsequent phase right, we are more likely to hold onto our players.

CORE DETAILS		Phase	1. FUN	2. UNDERSTANDING	3. DEVELOPING	4. EXCELING	5. PERFORMANCE	6. ELITE	Hockey 4 Life
OVERVIEW		Phase	Introduce fundamental movement skills (ABCs) with & without a stick using fun games and activities. Emphasis on fun.	Introduction of hockey specific skills along with further development of the ABCs. Emphasis on fun.	Technical areas developed increasing pressure & decision making with a focus on improving speed & vision. Player pathway splits at this phase with a recreational stream and a performance stream.	Players start to specialize in this phase whilst further developing game decision making. Greater emphasis is placed upon the training environment to prepare for competition.	Preparation focuses on developing the ability to compete. Training is planned to ensure players peak for key events in the competitive programme.	Elite athletes identified with the potential to play on the world phase.	<b>Hockey 4 Life</b> can be summed up in 4 phrases:  <b>FUN:</b> Enjoyment of hockey whether as a player, parent, coach, umpire, volunteer, administrator or supporter  <b>FRIENDS:</b> Sociability through an involvement in a team sport, on or off the field  <b>FITNESS:</b> Health benefits associated with playing sport  <b>FOR ALL:</b> Opportunities to take part regardless of gender, age, sexuality, religion, ethnicity or ability

LATE STARTERS				If hockey is started at this age, players should cover the technical aspects of the Fun Phase before proceeding into this Phase.	If hockey is started at this age, players should cover the technical aspects of the Understanding Phase before proceeding into this Phase.				
TECHNICAL - OUTFIELD		<b>EARLY PHASE:</b> Movement skills the priority • Fun introductory stick and ball games • Introduce movement of the ball • Receiving the ball - forehand  <b>LATE PHASE:</b> • Movement skills still a priority • Fun stick and ball games developing vision • Ball carrying to include changes of direction • Develop movement of and receiving ball in motion	As per Phase 1 plus • Develop elimination skills to include 3D concepts, minimal touches and vision • All passing and receiving techniques to be on move - forehand and reverse • Introduction of basic defending process in 1 v 1 - close down, channel, dispossess	<b>PRIMARY TARGETS</b> As per Phase 2 with a focus on • Increased pressure (and decreased space), vision, decision making <b>TECHNICAL AREAS:</b> • Overload techniques for 2 v 1 & 3 v 2 • All passing techniques at pace • Forehand/reverse & off both feet • Lifted passes - lateral and vertical • Aerial pass (overhead) • All receiving techniques at pace • - Forehand & reverse • Lead runs and movement to receive ball - with vertical philosophy • Defending - Understanding of marking position and cover • Intercepting	<b>PRIMARY TARGETS</b> As per Phase 3 with a focus on delivering performance Phases 1-3 plus <b>TECHNICAL AREAS:</b> • Advanced elimination techniques with feints and 3D skills • Overload techniques for 2 v 1 & 3 v 2 • First time passing • Lead runs • Advanced defending techniques including shave/steal • Advanced goalscoring under pressure including tip ins • Position specific technical development	<b>PRIMARY TARGETS</b> As per Phase 4 with a focus on • Decision making and delivery of high standards of technical competence and lack of technical breakdown under pressure  <b>TECHNICAL AREAS:</b> • Phases 1-4 plus • Advanced elimination techniques with feints and 3D skills • First time passing and scoring techniques including diving • Advanced defending techniques including diving • Advanced goalscoring under pressure and diving/improvising techniques • Position specific development	<b>PRIMARY TARGETS</b> International hockey is a rapidly changing and fast moving domain. It is the job of the National Senior Coaches to constantly review and update area with a focus on the following:  • High level of technical competence performed under pressure • Training of basic and high level skills at maximal pace and intensity • Maintaining high technical skill execution whilst fatigued and under pressure		
TACTICAL		• Direction of play • Awareness of space (in attack) • Restricting space (in defence)	• Basic attacking principles linked to technical areas through Conditioned Games • Basic defending principles linked to technical areas through Conditioned Games • Players work in all positional areas of the pitch	• Development of Vertical Philosophy into game play • Defending - understanding of marking position and cover • Double team defence  <b>MID-LATE PHASE:</b> • Introduction of 4-3-3 philosophy (with Centre Backs) • Introduction to Outletting • Introduction to Pressing - static and moving • Movement to create space	• Further specialization of Penalty Corner attacking skills (x2) and application with varied defensive set ups • Specialisation and delivery of a Penalty Corner Defending skills • Attacking frees circle & long corners	• Development of Vertical Philosophy into game play • Outletting with Vertical philosophy and variation • Pressing high and deep • Counter attack  <b>ADVANCED:</b> • Movement patterns - lateral and vertical interchange • Playing against varied defences (ie half court) • Unbalancing in attack	Continuation of phase 4 • Development of Vertical Philosophy into game play • Outletting with Vertical philosophy & variation • Movement patterns - lateral and vertical interchange • Counter attack & counter defence • Unbalancing in attack • Varying tactics within games • Applying tactics and systems	All aspects of phase 5 are still relevant at this level. The primary focus at this phase is developing the ability to respond to the opposition by changing tactics within matches.  • Variation of tactics during phases of the game • Responding to opposition tactics and strategy during and between matches	
SET PLAYS		None	None	• Introduction and development of a range Penalty Corner attacking skills • Penalty strokes	• Further specialization of Penalty Corner attacking skills (x2) and application with varied defensive set ups • Specialisation and delivery of a Penalty Corner Defending skills • Attacking frees circle & long corners	• Delivery of Penalty Corner attacking skills and application against defensive set ups • Delivery of defending skills with varied defensive set ups • Defending circle frees & corners	Delivered through specialist coaching and training sessions • Ability to deliver with disguise in all penalty corner attack techniques • Ability to change format (ie. Double castle) in penalty corner attack /penalty corner defence. All players to have 2 specialist corner skills (min)		
GKS		• Balance, co-ordination and footwork • Principle of let all players try (with lightweight balls) • Body position and movement • Saving and clearing with feet • Positioning in relation to ball and goal	• Balance, co-ordination and footwork in kit • Further work on body position and movement • Saving and clearing with both feet • Save and clearing with hand and stick if ready • Narrowing angle and 1 v 1	• Continuing work on Phase 1 & 2 skills (increasing pressure) • Save and clearing with hand and stick • Diving (if ready) • Smother techniques - both side (if ready) • Penalty corner defence skills including logging / penalty strokes • Communication and working with defenders	• Continuing to work on Phase 2 & 3 areas • Diving • Combination saves (footwork/balance/speed between) • Controlling 8m area and saves with other areas of body • Focus on high and low drag flick saves • Set games focused on circle entries	All previous skills plus: • Ability to reposition at speed • Controlling rebound saves • Baseline saves and working with defenders	All previous areas worked at high intensity and whilst fatigued. Improvised saves ie. using head		
PHYSICAL, MENTAL, HEALTH		<b>PHYSICAL:</b> • Basic movement literacy with fun • Agility, balance & coordination developed through games in short (< 5 seconds) bursts • Aerobic and anaerobic capacities developed through games  <b>MENTAL:</b> • Having fun • Character Building • Fair Play and ethics (Sportsmanship) • Basic self awareness  <b>HEALTH:</b> • Hockey to form one of a variety of sports  <b>DELIVERED BY:</b> Coaches / teachers / parents	<b>PHYSICAL:</b> • Sport Specific ABCs • Aerobic endurance to growth spurt • Strength developed through body weight exercises • Flexibility  <b>MENTAL:</b> • As per Phase 1 • Character Building • Responsibility • Patience • Difference between right and wrong  <b>HEALTH:</b> • Hockey to form one of a variety of sports • 25% fitness through hockey • Basics of healthy nutrition & hydration  <b>LIFESTYLE SKILLS:</b> • Positive Communication  <b>DELIVERED BY:</b> Coaches / teachers / parents	<b>PHYSICAL:</b> • Reinforce ABCs due to challenges of puberty • Speed training • Power training after growth spurt • Body strength after menstrual cycle (girls) & growth spurt (boys) • Flexibility  <b>MENTAL:</b> • Coping strategies - dealing with success and failure • Concentration • Handling competition • Decision making  <b>HEALTH:</b> • Hockey becomes the main specialist sport • Nutrition - increased information on needs for athletes • Rest and active recovery  <b>LIFESTYLE SKILLS:</b> • Personal Responsibility • Basic Time Management  <b>DELIVERED BY:</b> Coaches, semi-specialists	<b>PHYSICAL:</b> • Speed phase priority - early phase • Anaerobic training - end of phase • Introduction of core stability and rehab • Strength using body weight (Home Conditioning)  <b>MENTAL:</b> • Dealing with success and failure • Building confidence and self-motivation • Handling competition and increased pressure • Pre match strategies and routines • Target setting - short and long term • Distraction control - concentration and attention  <b>HEALTH:</b> • Hockey is main sport, but complementary sports participation is encouraged • Importance of rest and recovery • Eating and drinking for sport • Injury prevention (and screening)  <b>LIFESTYLE SKILLS:</b> • Coping with transition • Dealing with social pressure • Time management	<b>PHYSICAL:</b> • Periodised planning for key competitions • Introduction of free weight training techniques • Positional specific aerobic/anaerobic endurance • Speed -agility training towards competition  <b>MENTAL:</b> • High intensity training culture • Self-motivation • Critical evaluation of performance • Dealing with setbacks (contingency planning) • Confidence building techniques • Develop mental and physical practice plans • Regulating skill processes with skilled performance  <b>HEALTH:</b> • Managing time and life balance • Eat to match training/competition phase • Post match recovery  <b>LIFESTYLE SKILLS:</b> • Lifestyle choices and decision making	<b>PHYSICAL:</b> • High level and individualised periodised plans • Weights sessions 2-3 times per week to include functional work for specialist skills • Positional specific aerobic/anaerobic endurance phased running programs • Speed/agility quickness work  <b>MENTAL:</b> • Individualised mental input and strategies • The role of thinking in developing elite performance • Self monitoring of goals • 'What if' competition contingency planning strategies • Competition state and mindset  <b>NUTRITION:</b> • Individualised nutrition plans • 24/7 hydration  <b>OTHER:</b> • Personalised recovery strategies and flexibility plan • Video analysis  <b>LIFESTYLE SKILLS:</b> • Media skills • Career transitions - life after playing		

# HOOKEED FOR LIFE - DETAILED PHASE GUIDE
